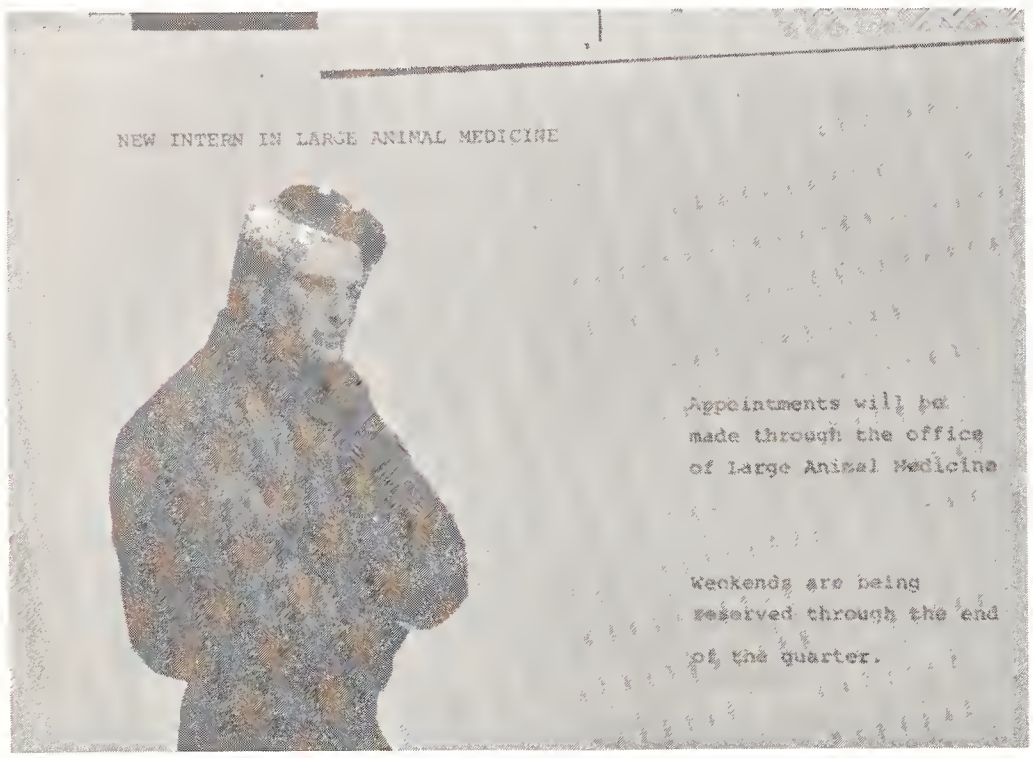
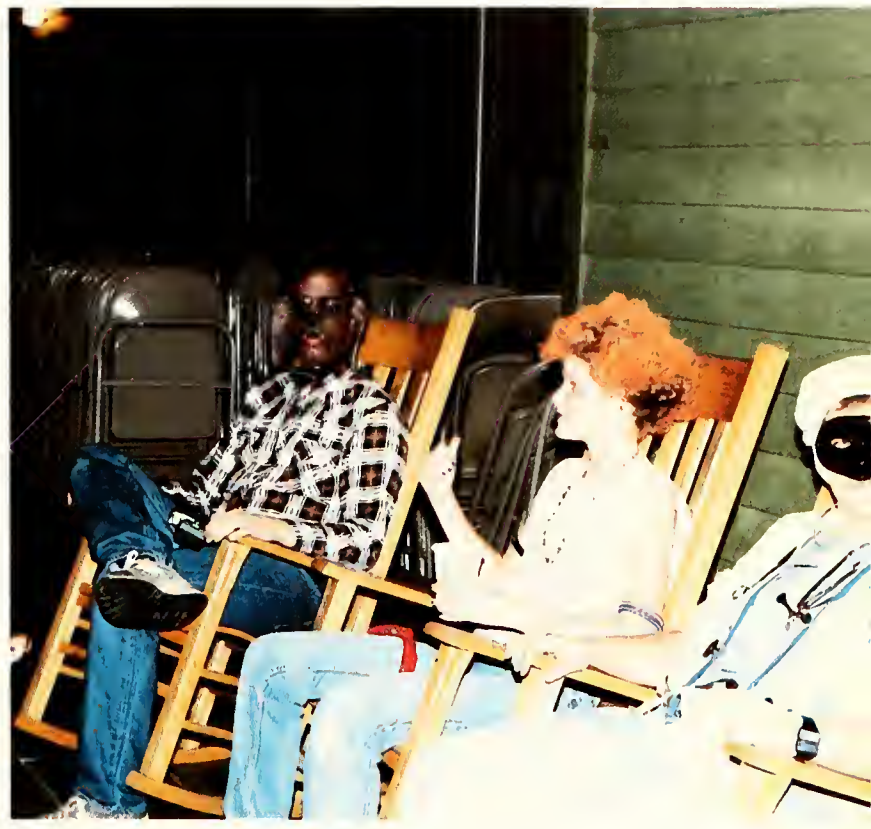
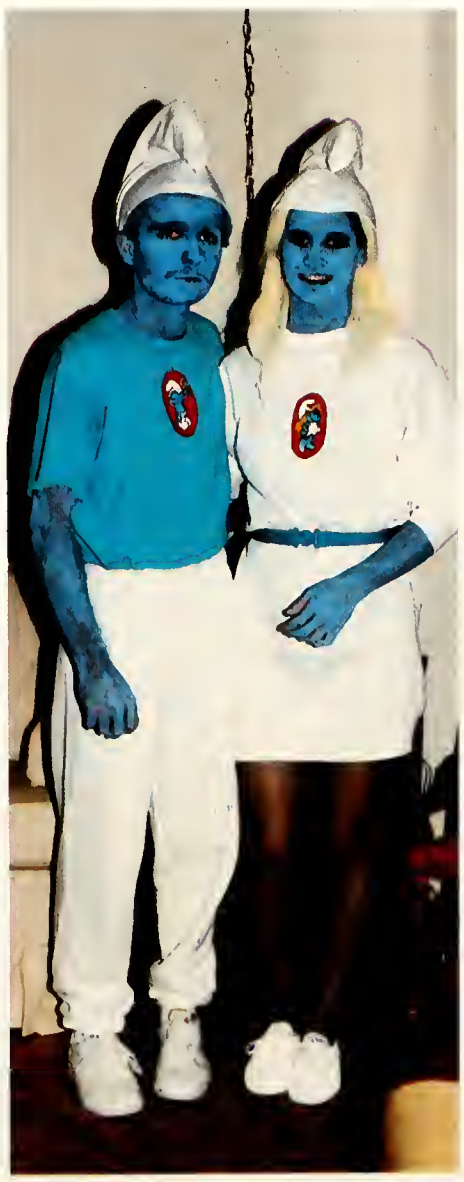
VETERINARIUS:
A Year In The Life Of A Veterinary Student



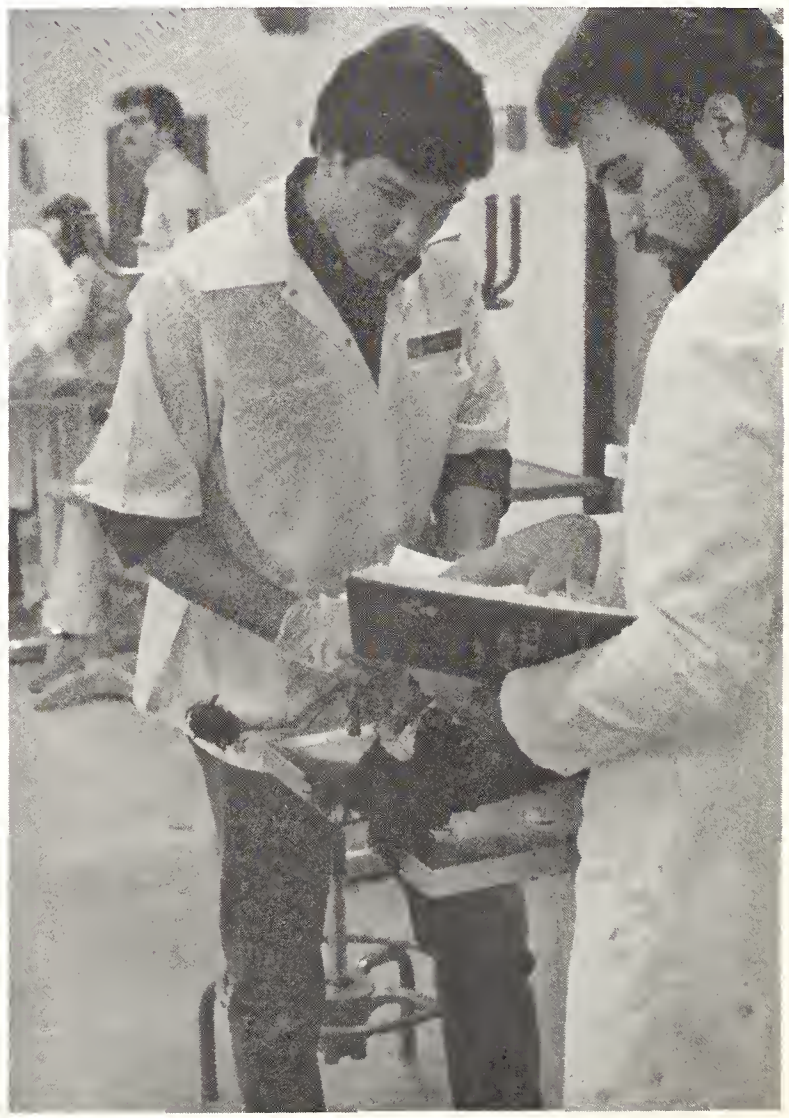
NEW INTERN IN LARGE ANIMAL MEDICINE
Appointments will be made through the office of Large Animal Medicine
Weekends are being reserved through the end of the quarter.

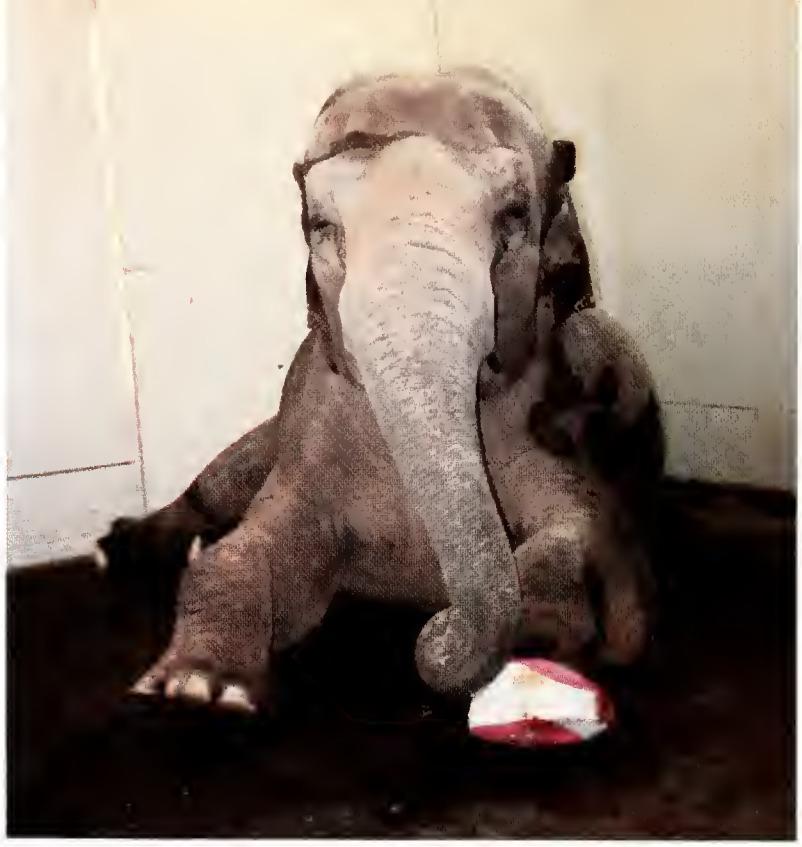
HALLOWEEN





BOYS





HELLO

Dedication

Challenge (n): 1. a difficult, assertive quest 2. a personal, intense desire to achieve a goal or set of goals 3. Med II with Dr. Craig Greene. This word, challenge, better than any other describes life in the Small Animal Teaching Hospital with Dr. Greene, but each senior student will agree, there is not better way to learn and noone better from whom to learn it. The things that remind us of Dr. Greene are many . . . "Don't overstate" . . . "I think you need to do some reading" . . . "Are you a 912?" . . . "That's an overstatement" . . . "Have you read the chapter on that in my book?" . . . "Joe and Josephine Vet in Ludowici, Ga. It's 2:00 a.m." . . . "You're overstating again." We will remember Dr. Greene for his knowledge and his eagerness for us to learn from it. But most of all, he taught us that which is hardest to teach: to think. He taught us to use our eyes, our hands, our books, our minds. For these reasons and many more, the Class of 1985 is very proud to dedicate this years Veterinarius to Dr. Craig Greene. And that is an understatement!!

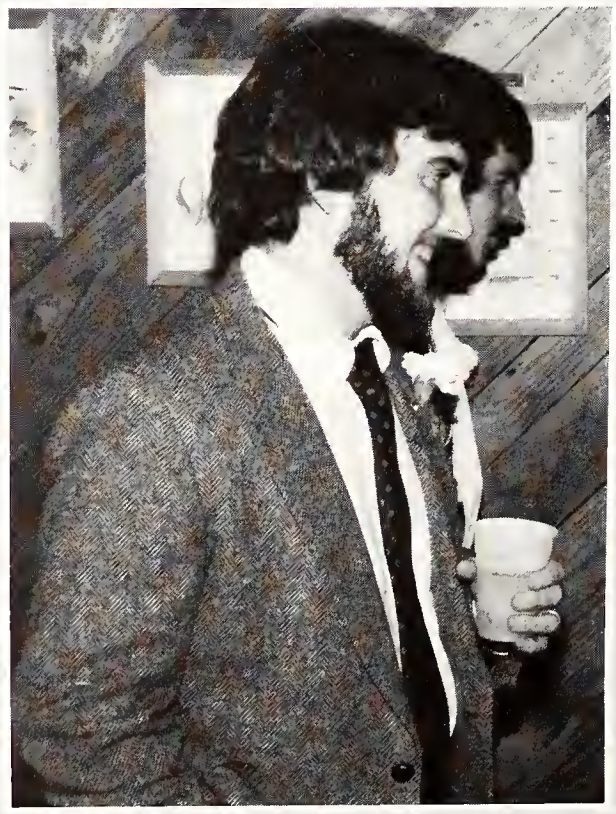
ΩΤ



did you ever
feel like a
fire hydrant

The staff of the Veterinarius would like to extend sympathy to the family and friends of Mary Carroll Rowan. Mary Carroll was a colleague and friend, and as a student in the class of 1987, she will be well remembered. Mary Carroll's love and understanding of the equine species lead her to our college. Her dreams and hopes had been well planned and she was striving to fulfill them. Unfortunately, those dreams have been left for others to pursue, and through her death, may we all be able to see that though we have a destination in mind, we must not forget to enjoy the journey.

Well, here it is, another year of Vet school gone by. Whether it was your first year, last year, or somewhere in between, I hope this book has captured some memories for you. Putting together a yearbook is no easy task and I would like to thank everyone involved for their help: Wayne for the benefit of his experience and knowledge, Pam for being my right-hand-person, and Kris, Jimmy, Allie, Mike, and Mary for all of their hard work and dedication. A special thanks goes to Brenda and Dr. Lorenz for all of their support and encouragement through some very trying times. I would also like to express my gratitude to John Parker, our Josten's representative, for his patience working with an inexperienced editor. Last but not least, to all the students, faculty, and staff for their smiling faces.

enjoy!
Vicki

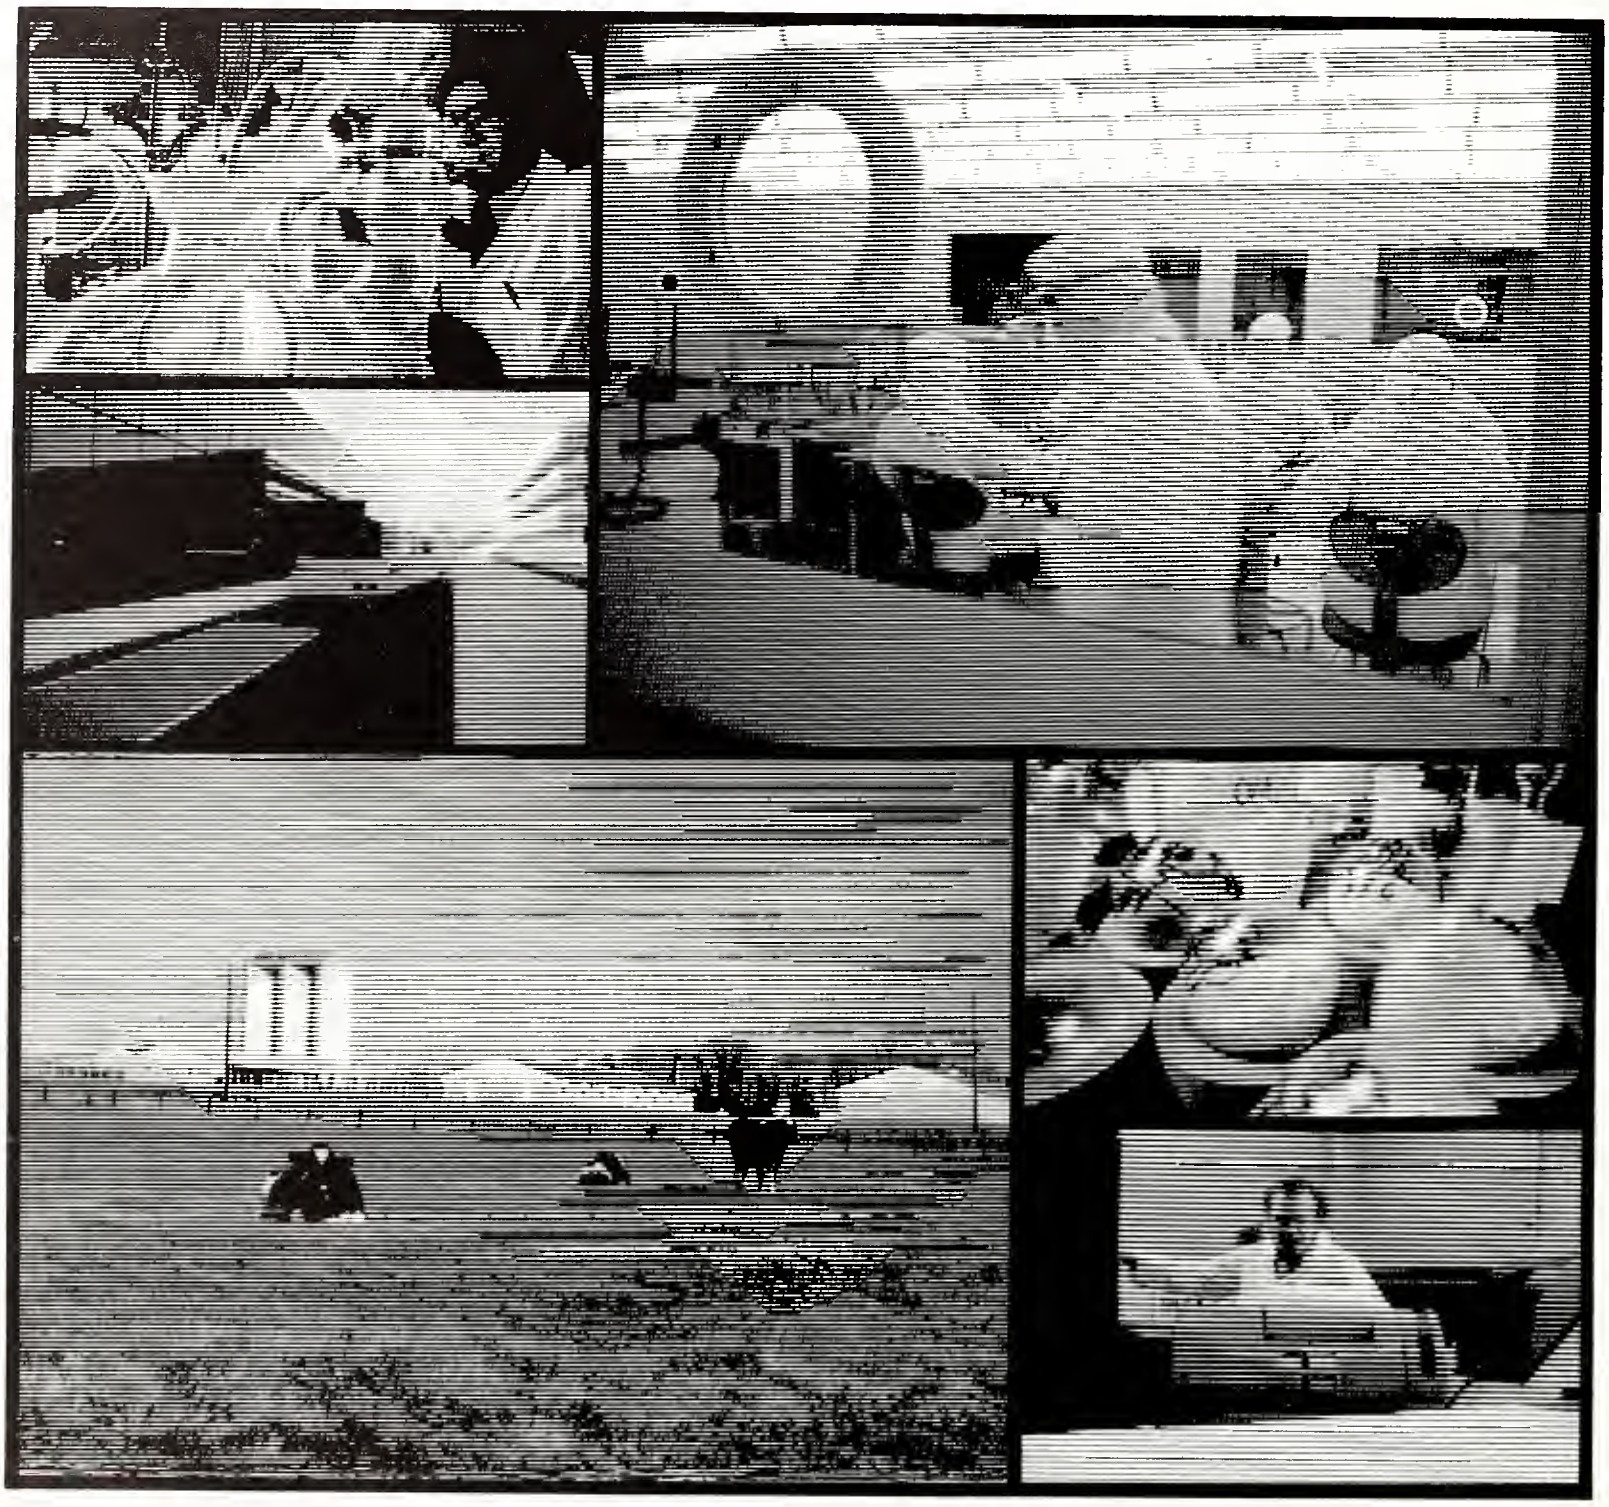
Playmate

ADVERTISEMENTS

The Veterinarius Staff Would Like To Thank All Of The Sponsors Whose Support Helped To Make This Yearbook Possible. As Veterinary Students And Later As Professionals In The Community, We Should Patronize These Companies And Remember Their Contributions To The Veterinarius.

Schering Animal Health.

Over 25 years of commitment to improving veterinary medicine through innovative, quality products.



Schering Veterinary is a part of Schering-Plough Corporation, a worldwide manufacturer of consumer and health care products.

Stimulants for learning

Squibb aids the study of veterinary medicine with its Veterinary College Program.

Your veterinary college is developing many fine doctors. And Squibb wants to support that development.

That's why we established our Veterinary College Program. It's designed to help students and their schools in a number of ways.

Squibb awards an annual research grant to a postgraduate resident at each veterinary college. These grants can be used for research in a variety of disciplines.

Squibb sponsors trips for a selected student from each college to the annual meeting of the American Veterinary Medical Association. We provide special publications year 'round, including Clinical Symposia, *Dermatology Reports* and *Equine Sportsmedicine.*

Other Squibb contributions include a comprehensive handbook about the business considerations of opening a practice; special discounts for your college pharmacy on all Squibb veterinary products; and cooperative research ventures between Squibb and interested investigators in the colleges.

These are the main elements of our Veterinary College Program now. And we hope to add even more in the near future. We believe stimulants for learning are very good medicine.

The tomorrow people

They come from different parts of the country. Even from different countries of the world. People who transcend geographic boundaries and speak a language of their own. The language of veterinary research.

They are the tomorrow people. The men and women of Norden research.

Over the years, professional journals have told of their many achievements: stable cell line culture . . . first distemper-measles vaccine . . . development of temperature-specific vaccine virus . . . adeno type-2 respiratory protection . . . E. coli vaccine with an exclusive genetically-engineered toxoid . . . the list goes on.

The challenge also goes on. At the moment, research projects are underway in recently enlarged facilities. Projects that may begin with something as simple as making improvements in an existing product . . . or as exciting as a vaccine for feline leukemia.

While there are few limitations on the scope of research, there is always present a challenge to deliver not just a new product, but a new concept within that product. Our tomorrow people do not opt for the me-too. Rather, they seek the technological edge. The something extra that can make Norden products distinctive, exclusive . . . better for you and the profession.
